Agreement concerning In Vitro Fertilisation treatment with Intracytoplasmic Sperm Injection

The undersigned,

Ms, born

and Mr....., born

Address:

have confirmed their wishes below by deleting the options they do not prefer or which are not applicable to their situation and by signing this form.

They have read the information leaflet on In Vitro Fertilisation (IVF) published by theand agree to the treatment as described in this leaflet. yes/no*

They have read the annex on Intracytoplasmic Sperm Injection (ICSI) and agree to the treatment as described in the annex. yes/no*

They grant their consent for their data, as collected for the IVF/ICSI *without* their names being recorded, to be used for the benefit of yes/no*

- medical records yes/no*
- evaluation of the treatment applied yes/no*
- scientific research by the doctors responsible for the treatment yes/no*

If any sperm has been or will be frozen, they accept the terms and conditions that apply to the freezing of sperm for the purpose of ICSI treatment (as explained in the IVF information leaflet). yes/no*

They are aware that the sperm will be disposed of, without prior notification to the undersigned, after the agreed storage period (that is, the duration of three ICSI treatments or a period of one year from the time the sperm is frozen) has expired. yes/no*

They are aware that if they wish to have the frozen sperm stored for a longer period of time than that referred to above, they have to submit a written request. yes/no*

Agreement concerning In Vitro Fertilisation treatment with Intracytoplasmic Sperm Injection

They agree to have one or, at the most, two embryos transferred to the uterus after the egg collection, in accordance with ... regulations (as explained in the IVF leaflet). yes/no*

If more than one or two embryos have been obtained, they agree to allow the extra embryos to be frozen for transfer at a later date, provided that the embryos in question are suitable for freezing. yes/no*

They are acquainted with the rules applied by the.... for the freezing and storage of embryos (as explained in the IVF information leaflet) and agree to these rules. yes/no*

They agree to having a maximum of two frozen and defrosted embryos transferred to the uterus. yes/no*

Eggs that have not been fertilised (1), eggs that have been abnormally fertilised (2) and embryos that have not been transferred but are of insufficient quality to be frozen (3) may be either destroyed, or made available for scientific research purposes within the.... The ...is engaged in scientific research aimed at improving the IVF method and at developing new techniques to detect serious hereditary disorders at an early stage (as explained in the IVF information leaflet). Sex cells and embryos made available for such research will be kept in the laboratory for a maximum of seven days.

The undersigned hereby make it known that the procedure to be followed with regard to any eggs or embryos such as those described in the preceding paragraph is to be:

- (1) Unfertilised eggs: request for destruction/ consent for use in research*
- (2) Abnormally fertilised eggs: request for destruction/consent for use in research*
- (3) Embryos not transferred and
not suitable for freezing: request for destruction/consent for use in research*
