WE CARE !

We are sensitive to environment issues. We are always trying to be more sustainable and less polluting.

SUSTAINABILITY

Since its establishment in 1997, the D&P Group has evolved around strong family values, incorporating humanity, innovation, and environmental considerations at the core of its strategy. The aim is to provide unique events while generating value for visitors.

Since 2015, the D&P Group has expedited its shift towards more sustainable environmental practices by transforming its model in design, production, and on-site implementation.

Consequently, this year, the D&P Group has undertaken the ISO 20121 certification process. This is intended to establish a new system of responsible management applied to its events activity.
