| HOW TO WRITE A PAPER? |
| :--- |
| André Van Steirteghem |
| Professor-Emeritus Vrije Universiteit Brussel <br> Honorary Consultant Centre for Reproductive <br> Medicine <br> Editor-in-Chief Human Reproduction |

$\qquad$

Thanks to Professor Hans Evers,
Deputy-editor of Human Reproduction
for providing me the slides of lectures
he has given at Authors' Courses of ESHRE

I have no competing interest to declare
$\qquad$
$\qquad$
$\qquad$
$\qquad$
$\qquad$
$\qquad$
$\qquad$

Eighteen paragraphs can make a paper.
$\qquad$
$\qquad$
$\qquad$
Hans Evers

First, 5 slides on peer review

At some time in our scientific career, $\qquad$ we all are:
$\square$ Author
$\square$ Reviewer
$\square$ Reader
$\qquad$
$\qquad$
$93 \%$ of 3040 researchers said that they reviewed altruistically to play their $\qquad$ part as a member of the academic community. $\qquad$
Peer review, benefits, perceptions, alternatives. 2008

| Author - Reviewer - AE - EiC |
| :--- |
| "The critical feature that makes the peer |
| review system work is the skill and insight |
| of the editor" |
| "Astute editors can use the system well, the |
| less able who follow reviewers comments |
| uncritically bring the system into |
| disrepute". |
| "Peer review should be used to inform the |
| author and the editor" |
| Pubbishing Research consortium, 2008: Peer review in scholarly journals |

Peer review improves the quality of the published paper

## Peer review

"There is little empirical evidence to support the use of editorial peer review as a mechanism to ensure quality of biomedical research publications, despite its widespread $\qquad$ use and costs".

Cochrane Collaboration, 2003

## Peer review

Without peer reviewers, the whole edifice of scientific research and publication would have no foundation. $\qquad$

Oral contraceptives and GnRH-agonists show $\qquad$ similar outcomes in endometriosis.

It has been suggested that the treatment outcome of GnRH-agonists in endometriosis is superior to any other medical treatment. $\qquad$
$\qquad$
$\qquad$
$\qquad$
Hum Reprod 2006: 22, 112-118

| Motivation | Example |
| :--- | :--- |
| Purpose | This paper presents an evidence-based approach <br> to diagnosing PID. |
| Scope | This paper discusses 5 causes of fertilization <br> failure after ICSI. |
| Viewpoint | Calling ART clinicians 'providers' insults our <br> professionalism. |
| Quotation | Recently, in Human Reproduction, Van <br> Steirteghem reported ... |
| Question | Which is the safest way to perform a <br> laparoscopy? |
| Action | The diagnosis of PCOS is not based on <br> ultrasound findings. Is this logical? |
| Case report | Now is the time to reconsider blastocyst transfer. <br> The next patient you see may have porphyria. <br> Will you recognize it? |
| Statistic | 1 in 6 high school girls is chlamydia positive. |

| I ntroduction |  |

$\qquad$
$\qquad$
$\qquad$

## What IMRAD does not address

$\square$ The title
$\square$ The authors
$\square$ The abstract
$\square$ The acknowledgements $\qquad$
$\square$ The references
$\qquad$
$\qquad$
$\qquad$

| About titles |
| :---: |
| SET in IVF |
|  |
|  |
|  |
|  |

## About titles

In unselected patients, elective single embryo transfer prevents all multiples, but results in significantly lower pregnancy rates compared with double embryo transfer: a randomized controlled trial.
$\qquad$
$\qquad$
$\qquad$
$\qquad$
$\qquad$
$\qquad$

| About titles |  |
| :--- | :--- |
| NEJM | Concise and descriptive, not declarative |
| Lancet | Concise but informative |
| Ann Int Med | As brief as possible while conveying <br> essential features of the article's content |
| BMJ | Keep them concise |
| HR | Specific and informative, should not <br> exceed 25 words |

$\qquad$
$\qquad$
$\qquad$
$\qquad$
$\qquad$
$\qquad$
$\qquad$

| Waste words |
| :--- |
| Auricular electro-acupuncture as an |
| additional perioperative analgesic method |
| during oocyte aspiration in IVF treatment |
|  |

Waste words
Auricular electro-acupuncture as an
additional perioperative analgesic method
during oocyte aspiration in IVF treatment
Analgesia by acupuncture during oocyte aspiration
$\qquad$
$\qquad$
$\qquad$
$\qquad$
$\qquad$
$\qquad$
$\qquad$

## Essential for titles

$\square$ Concise and precise
$\square$ Informative and descriptive
$\square$ Not misleading or unrepresentative
$\square$ Specific: type of study (RCT) and numbers (if large)
$\square$ Words appropriate for classification
$\square$ Interesting, not dull, lure grazer into $\qquad$ reading

$\qquad$
$\qquad$
$\qquad$
$\qquad$
$\qquad$
$\qquad$
$\qquad$

|  |  |  |  |  |  | Describe paper in 1 or 2 <br> sentences | A epidemiological geographically based study of the <br> quantity and effects of ionising radiation received <br> by male employees of a nuclear reprocessing plant <br> and male residents working elsewere in the same <br> vicinity shows an increased risk of infertility in <br> nuclear workers only. (41 words) |

## And finally

## What to do if your paper is still rejected?

## Rejection letter

Dear Editors,
Thank you for rejecting our paper. As you know we receive a great many rejections, and
nfortunately it is not possible for us to
ccept all ovien. Your rejection was
arern on their opinions
ind that it is
ind that
lack of esteem for you or your journal, and that you will not hesitate to reject e hope that you will hot hesitate to rejec our papers in the future
$\qquad$

Yours sincerely,
Professor Hedgehog
