content and container pelvis

# Embriogenesis

# Diferenciación sexual

## Sexual differentiation

- ▶ El primer signo de la diferenciación sexual aparece en la superficie ventral
- ▶ The first sign of sexual differentiation appears in the ventral surface

# Células Germinales Germ cells

Células germinales migran hacia el embrión desde el saco vitelino  
Las gónadas indiferenciadas se forman en el interior de la cresta genital.

Germ cells migrate to the embryo from the yolk sac

The undifferentiated gonads are formed within the genital ridge.

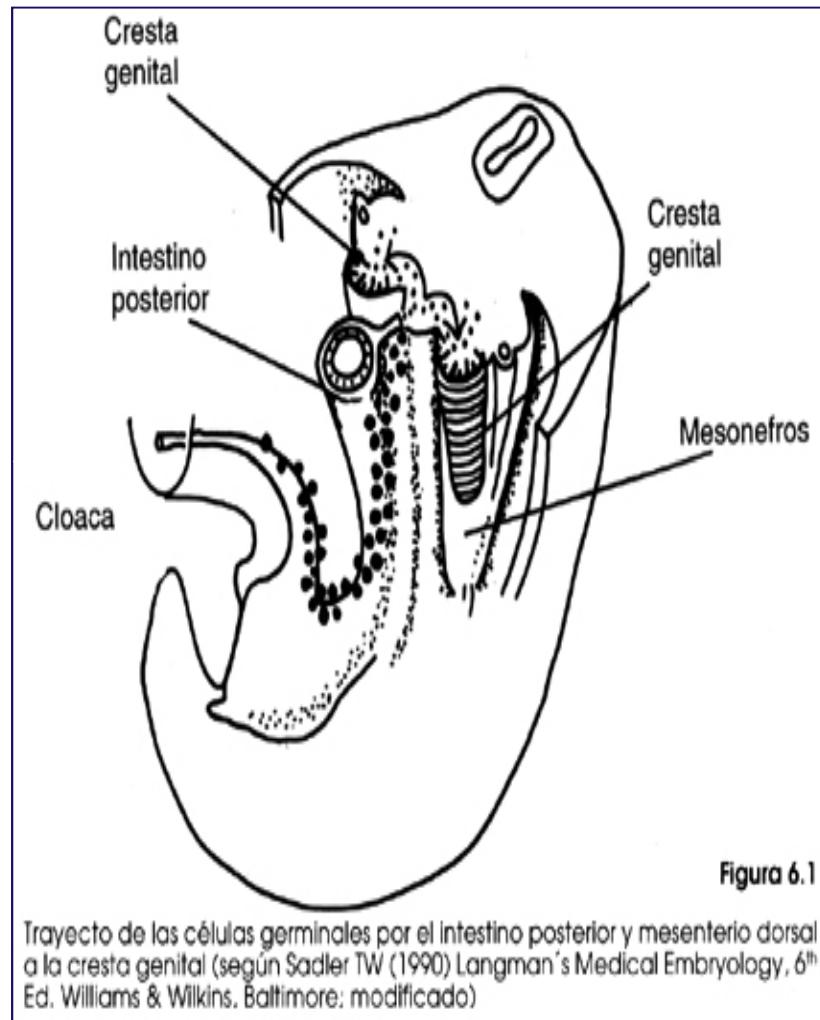

Figura 6.1

Trayecto de las células germinales por el intestino posterior y mesenterio dorsal a la cresta genital (según Sadler TW (1990) Langman's Medical Embryology, 6<sup>th</sup> Ed. Williams & Wilkins, Baltimore; modificado)

# División celular

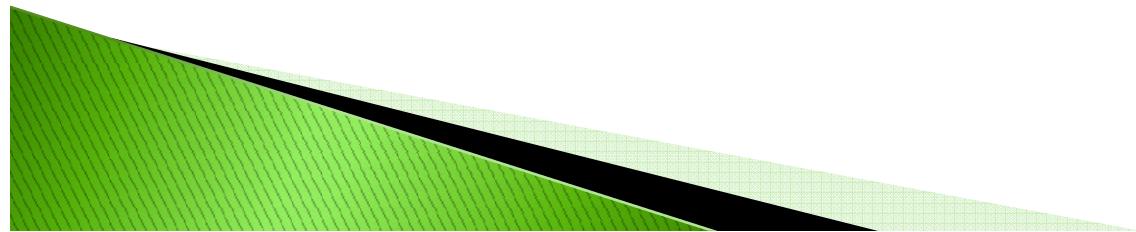

## Mitosis

División de la célula y multiplicación

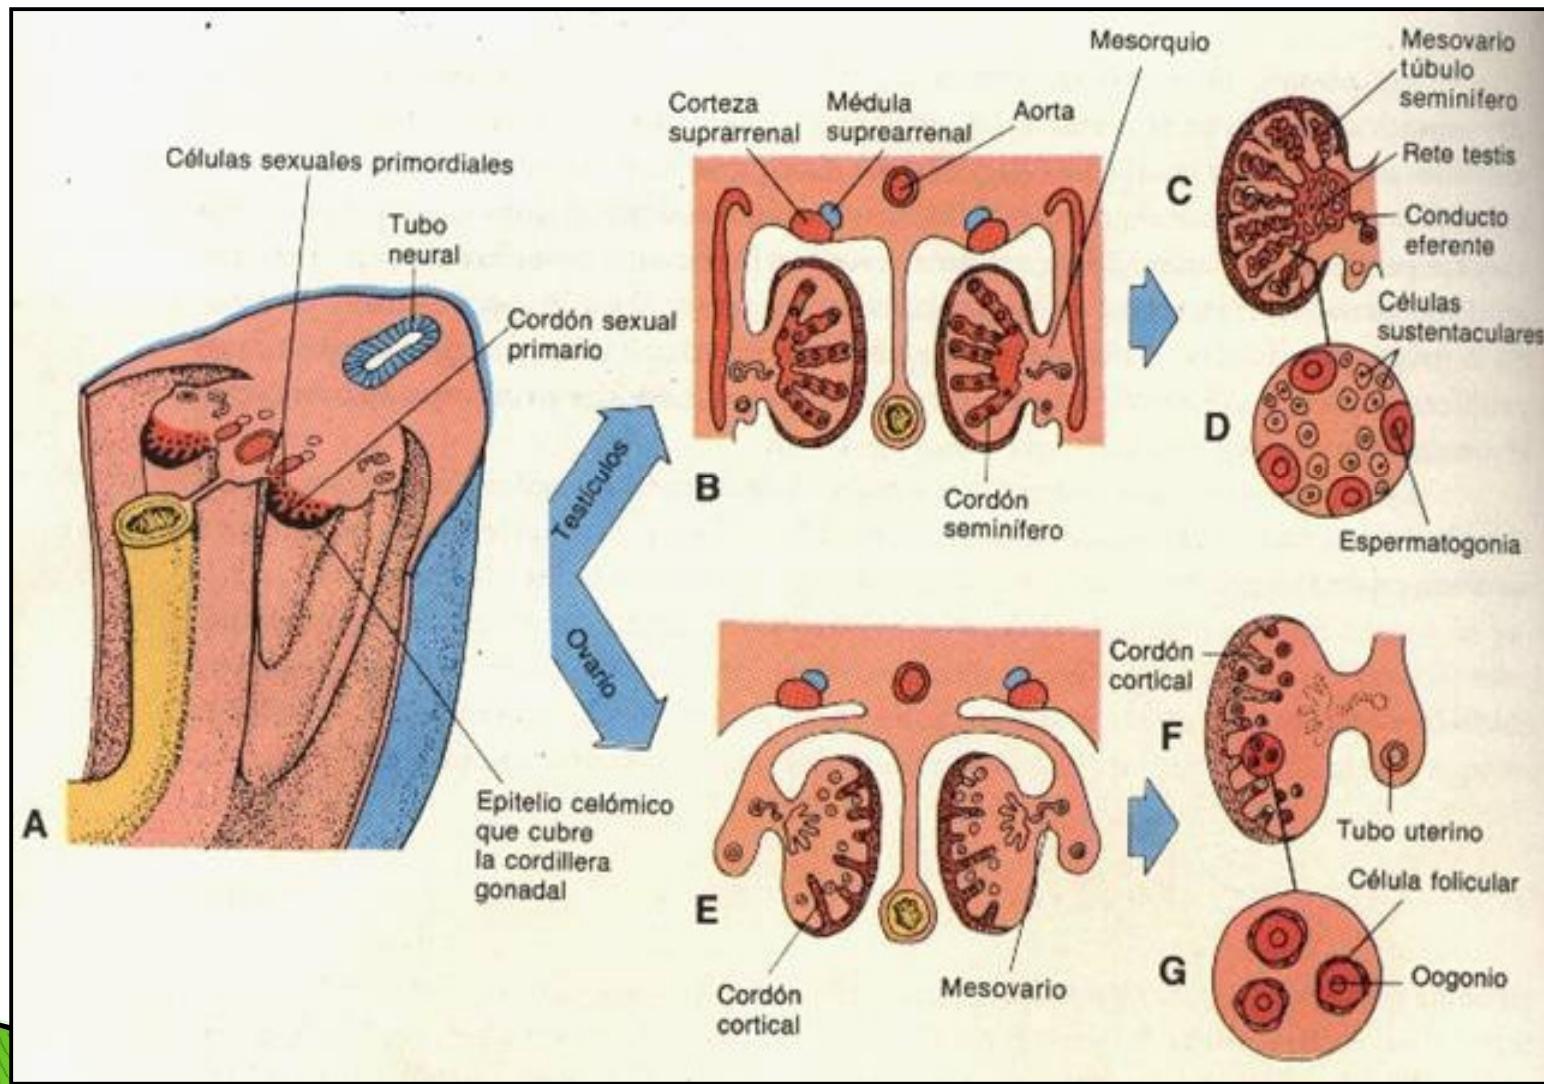

- ▶ Cell division and multiplication .

## Meiosis

- ▶ Reducción de la división, de  $2n$  a  $1n$ .
- ▶ Cromosomas propios de la especie.
- ▶ Reduction division,  $2n$  to  $1n$ .  
Chromosomes characteristic of the species.
