

8D form = Team Oriented Problem Solving

| 1 | 2B |
|--------------|---------------------|
| TEAM | What is the problem |
| Team leader | |
| Participants | |

| 2A | IS | IS NOT |
|-----------|--|---|
| ОНМ | Who is affected by the problem? Who detected the problem at first? To whom was the problem reported? | Who or what was not affected by the problem? Who did not detect the problem? |
| WHAT | What type of problem is it? What is typical for the problem? What is exactly happing? Is there physical proof of the problem? | Who or what samples do not have the problem or are not affected by the problem? What could happen, but did not happen? What could be the problem, but is not the problem? |
| ∧н∧ | Why do we have this problem? In which process or at which process step did the problem occur? | Why is the above not the problem? |

| | With a manufacture of the second black and the second second | |
|----------------|---|---|
| ш | Where was the problem noticed? | Where could the problem be manifesting |
| WHERE | Where is the problem accurring? | itself, but it is not |
| ш | Where is the problem occurring? | Whore also could the problem acour? |
| H | | Where else could the problem occur? |
| 5 | | |
| | When was the problem first noticed? | When could the problem have been noticed, |
| Z | | but it was not |
| <u><u></u></u> | When has the problem been noticed since? | |
| WHEN | | |
| > | | |
| | What is the seize of the problem? | How big could the problem be, but it is not |
| | How big is the problem? | |
| ≥ રુ | | |
| 0 ĭ | How big is the problem in meaning of time, | |
| HOW (much) | patients, finances? | |
| \smile | | |
| | What is the trend of the problem | What could the trend be, but it is not |
| | What is the trend of the problem (continuous? Ad random? Cyclic?) | |
| > 2 | | |
| HOW (often) | Has this problem occurred before and what | |
| μĘ | did we learn from it at that time | |
| | | |
